

AI Research Engineer (Digital Pathology)

Medicus AI is seeking a talented AI Research Engineer to join our digital pathology and biomedical imaging research team.

Responsibilities:

- Develop deep learning models for pathology image analysis
- Design algorithms for cell detection and biomarker quantification
- Collaborate with research scientists and clinical experts
- Optimize AI models for large-scale biomedical datasets

Qualifications:

- Master's or PhD in Computer Science, AI, Bioinformatics, or related field
- Experience with Python, PyTorch, or TensorFlow
- Knowledge of computer vision and deep learning
- Experience with biomedical image analysis is a plus

Location: Seoul, South Korea

Employment Type: Full-time
