

Bioinformatics Scientist – Precision Oncology

Medicus AI is looking for a Bioinformatics Scientist to join our precision oncology research team.

Responsibilities:

- Analyze genomic and transcriptomic datasets
- Develop computational pipelines for biomarker discovery
- Integrate multi-omics and digital pathology data
- Collaborate with AI engineers and clinical researchers

Qualifications:

- PhD or Master's degree in Bioinformatics, Computational Biology, or related field
- Experience with R, Python, and genomic data analysis
- Knowledge of cancer biology and biomarker research
- Experience with large-scale biological datasets

Location: Seoul / Hybrid

Employment Type: Full-time
